WELCOME TO THE

GLOBAL FAMILY!

Our mission is to be more than just another successful company. We started Trévo with the **purpose and goal of empowering the dreams of others**, and to **transform lives** through the power of possibility. # THE STORY OF TRÉVO

The journey toward the creation of Trévo actually began years ago when Mark A. Stevens, CEO and founder of Trévo, was a young boy. As he watched his mother suffer years of pain and debilitation due to chronic illness, he also witnessed the hopelessness and depression that this long-term illness caused. Mark then became passionate about helping people live healthy lives so they could avoid the kind of sickness cycle that his mother experienced.

This passion, along with Mark and his wife Holli's over 60 years of combined corporate and field experience, provided a natural pathway to network marketing and the wellness industry. With a heart for people and a passion for global wellness, they have built Trévo as an extraordinary product with powerful business tools and an extraordinary compensation plan. The company's rapid expansion has allowed its founders to travel to all corners of the globe, spreading the incredible life-changing power of Trévo and the amazing opportunity for an extraordinary life that it offers.

While the business continues its explosive growth all over the globe with the goal of becoming the next billion-dollar brand, Mark and Holli continue to focus on the principles on which Trévo was founded. At the heart of Trévo is the founders' desire to provide people all over the globe empowering wellness, abundant prosperity and the ability to leave a lasting legacy. That is what Trévo is all about. It is not just a nutritional supplement company or a network marketing company. At its very core, Trévo is a people company built with a heart for people and the desire to see them empowered to live the Extraordinary Trévo Lifestyle.

"Years ago, when Trévo began its global search for the most nutrient-dense plants, herbs and fruits, we determined that we would never allow this product to simply become another 'me-too' product. Rather, we dedicated our energies to finding and obtaining nutrients that have the power to not only sustain life, but also to protect mankind from disease and prolong his longevity. Scientists are beginning to realize these nutrients actually hold the secrets of wellness."
